Skills

Languages

- HTML
- CSS/SASS
- JavaScript
- TypeScript

Frameworks

- React Native
- Redux
- Vue.js

Libraries/ API

- React
- Node.js
- GraphQL

Why Hire Me

Over a year of software development experience, developed numerous react applications from the ground up. Am constantly learning a new language be it computer or human.

Extremely passionate when it comes to learning languages and coding, have built an app specifically for you good people at Rosetta Stone.

Adding even more languages and features to it so by the time you interview me it will be even better, I would love it if you gave me something to add as a sort of code test! You can check it out [HERE!](#)
